

Did you know?

The following are facts about car sharing vs. car ownership:

1. The average cost of owning a car in the U.S is over \$8,000 per year! Included are the costs of fuel, insurance, repairs, and loan or lease payments.
2. Contrasted with the average daily use of the car, often less than an hour and a half per day, car ownership works out to be about \$18 per hour of usage
3. Car sharing offers much of the same convenience and flexibility of individual car ownership for a fraction of the cost.

FAQs

Who does the day-to-day work?

CSCOC is an all volunteer lead group of neighbors dedicated to the concept of car sharing. CSCOC members do the work of maintaining the cars, calculating the billing, processing membership applications, and managing the future of the CSCOC. CSCOC asks all of its members to make a contribution in some capacity – you can clean the car, join a committee, or even be a board member!

Who fills up the tank?

Each member is responsible for ensuring that the tank is at least half full for the next user. When a member notices that the tank needs to be filled they will fill it and submit the receipt for reimbursement on their monthly bill, or incur it as a donation if willing.

Availability & Scheduling

Availability

Ideally a car should be available to you 100% of the time. The reality is that this may not always be the case. The standard availability in other car sharing groups is that

vehicles are available for over 90% of the time. CSCOC is expecting to meet or exceed this level of service.

Scheduling

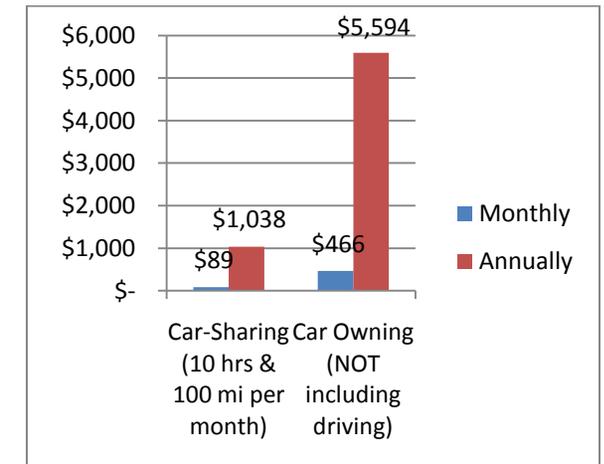

Vehicles will be booked using an online booking system. All vehicles MUST be booked before using.

Vehicles

CSCOC is currently researching purchasing or leasing new or used vehicles. The # of vehicles available will be determined based on initial membership. The types of vehicles being looked into are four door sedans and medium duty trucks.
